## About me

A Developer with growing experience across web development, C++, UI/UX design, competitive programming, machine learning fundamentals, and creative media. Balances technical skills with strong design capabilities—building functional apps, blogs and hackathon projects. Highly focused, consistent, and driven to build real-world products and startups.

---

## Skills

- Programming: C++, HTML, CSS (responsive units), JavaScript, Python (beginner), ML basics
- Web Dev: Responsive websites, blog systems, JSON-driven content, API integrations
- Design: Graphic design, posters, thumbnails, flyers, branding, motion graphics, video editing
- Tools: Figma, Adobe tools, Web deployment (Vercel)
- Other: Competitive programming, storytelling content creation.

---

## Projects

### Medisphere (Hackathon – Top 10):

Healthcare innovation platform connecting organ donors, recipients, and medical professionals. Built with focus on simplifying donor-recipient matching and improving communication.

### Sidframe Blog Website:

Personal blog platform built with HTML, CSS, JS, and JSON-based post loading. Added news pages, widgets, and dynamic elements.

### GreenTerk – EcoApp (Web Project):

Designed homepage, navbar system, interactive layout, sustainability-themed UI, and CO<sub>2</sub> emission calculator.

### Sidiotic Media:

Personal design & motion graphics portfolio. Includes thumbnails, posters, flyers, motion edits, and YouTube visuals.

### Alternate Reality Game (ARG):

Created story structure, puzzles, web pages, and interactive worldbuilding.

2D RPG Game (C++ Project – in progress)

Learning and implementing core game systems in C++ to build a full 2D RPG.

---

## Education

B.Tech – August 2024 – August 2028 (expected)

*Vignan's Institute of Information Technology, Duvvada*

---

## Achievements

- Top 10 at hackathon for Medisphere
- Consistently creating design + tech projects for portfolio
- Maintaining personal blog & content platforms

---

## Interests

- Web development
- Competitive programming
- C++ & game development
- Machine learning
- UI/UX design
- Content Creation, Direction
